

SMART CARDS/RFID CARDS FOR WATER ATM'S

Accord Power RFID/Smart Cards used with Water ATM (Anytime Water Machines), **water dispensation system which can be delivered water automatic with using smart card.** Operated by private companies, water ATMs provide an alternative solution to the safe drinking water challenge. Essentially water ATM is a community RO (Reverse Osmosis).

These water-ATM cards can be easily recharged through a smartphone-based app/Recharge unit. One has to place the card near a smartphone/Recharge unit, then the app will identify the card user, the recharge amount is entered in-app and a card is recharged.
